

## **Colorado Depends on Globally Engaged U.S. Companies**

#### **Overview**

- Colorado's economy includes 892 U.S. companies that operate internationally, competing in global markets on a daily basis for inputs, capital, and customers.
- These globally engaged U.S. companies serve as a critical engine of economic growth and source of employment in Colorado — accounting for 55% of Colorado's private-sector economic output and 50% of its private-sector jobs in 2011.
- These companies operate in a highly competitive global marketplace in which differences in national tax systems can be a decisive factor in where companies choose to invest.
- A more competitive U.S. corporate tax system can help sustain and expand the critical contributions that these companies make to Colorado's state economy, local communities, and working families.

### How Do Globally Engaged U.S. Companies Contribute to Economic Growth in Colorado?

Colorado's economy includes 892 companies that operate internationally, competing in global markets on a daily basis for inputs, capital, and customers. These globally engaged U.S. companies serve as a critical engine of economic growth for the state. For instance, they directly contributed \$58.7 billion to Colorado's economy in 2011. In addition, these companies indirectly contribute to the state economy by purchasing raw materials, intermediate products, professional services, and other inputs from other local businesses. They also serve as a source of income for workers in local communities, paying on average \$69,245 per job in wages, salaries, and fringe benefits in 2011. These payments boost consumer spending and drive additional economic activity throughout the state. Ultimately, all globally engaged U.S. companies directly and indirectly contributed \$132.6 billion to Colorado's economy in 2011 — accounting for 55% of the state's private-sector gross domestic product.

## How Do Globally Engaged U.S. Companies Contribute to Job Creation in Colorado?

Jobs Supported by Globally Engaged U.S. Companies Percent of Total, By Sector

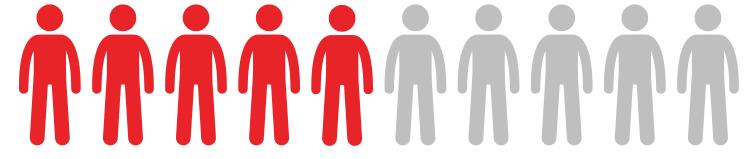

Globally engaged U.S. companies directly provided 481,000 jobs in Colorado in 2011, including 223,200 jobs in the services sector, 143,600 jobs in the trade and transportation sector, and 97,200 jobs in the manufacturing sector. These companies also indirectly employment throughout support communities by purchasing goods and services from other local businesses in Colorado. In fact, such purchases supported an additional 368,800 jobs throughout the state in 2011, including 69,400 jobs in professional and scientific services and 54,100 jobs in administrative services. Finally, these globally engaged U.S. companies, as well as their

suppliers, provide their workers with a source of income, which increased consumption spending and supported an additional 515,800 jobs in 2011, including 110,100 jobs in health care and social assistance and 82,300 jobs in retail trade.

In addition to providing their workers with a source of income in the form of wages and salaries, globally engaged U.S. companies provided \$2.3 billion in dividend payments to Colorado residents in 2011. These payments serve as another source of income to local residents, thereby providing an additional boost to the state's economy through the induced economic activity associated with increased consumer spending. In fact, these dividend payments supported an additional 11,000 jobs throughout Colorado in 2011.

In all, globally engaged U.S. companies directly and indirectly supported 1.4 million jobs throughout Colorado in 2011 — accounting for 50% of Colorado's private-sector employment.

## How Can We Sustain and Expand the Contributions of Globally Engaged U.S. Companies?

U.S. companies operate in a highly competitive global marketplace. As cross-border trade and investment have increased, the field of competition has widened in many industries. In this environment, differences in national tax systems can be a significant factor in where companies choose to invest.

Unfortunately, the current U.S. corporate tax system has become an outlier relative to the tax systems of our trading partners. The United States maintains the highest statutory corporate tax rate among OECD countries. In addition, the United States still uses an antiquated system of worldwide taxation, which imposes a second round of taxes on foreign earnings for U.S. companies.

# OECD Statutory Corporate Income Tax Rates 2013

Reforming the U.S. corporate tax system by reducing corporate tax rates and revising international tax rules would make the United States a more attractive location for companies to invest and base their global headquarters, while also encouraging them to return their foreign earnings for investment throughout the United States, including Colorado. Ultimately, a more competitive U.S. corporate tax system is critical to sustaining and expanding the contributions that globally engaged U.S. companies make to Colorado's economy, local communities, and working families.
